## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 28 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

1. This action is responsive to the applicant's communication filed on 8/28/2003.
2. Claims 1-36 are pending and are presented for examination.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, drawn to a method and apparatus for classifying incoming packet by maintaining a database associated with one or more patterns of fields, wherein the database is developed by: mapping each pattern to a unique numeric identifier; determining a range of one or more of the numeric identifiers; using a field for the incoming packet; matching the associated identifier, and determining how to process the incoming packet, classified in class 707, subclass 100.
  - II. Claims 16-36, drawn to a system, method and apparatus for packet classification, wherein a packet header of an incoming packet is received by a pre-processor, classified in class 709, subclass 238.

4. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as it is usable in a method and apparatus for classifying incoming packet by maintaining a database associated with one or more patterns of fields, wherein the database is developed by: mapping each pattern to a unique numeric identifier; determining a range of one or more of the numeric identifiers; using a

field for the incoming packet; matching the associated identifier, and determining how to process the incoming packet, classified in class 707, subclass 100. Without requiring a pre-processor to receive a packet header of an incoming packet of group II, classified in class 709, subclass 238. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and because the search required for each group is different and not co-extensive for examination purpose, these groups would require different searches in PTO's classification class and subclass. The group I search would require use of search classified in Class 707, subclass 104.1, which would not required for Groups II. The group II search would require use of search classified in Class 709, subclass 238, which would not required for Groups I. Therefore restriction for examination purposes as indicated is proper.

6. A telephone call was made to Attorney Joseph F. Haag on 3/3/2006 to request an oral election to the above restriction requirement, but did not result in an election being made because the attorney was not available.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2165

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
